The 12 June 2007 Final rejection has been withdrawn for a new rejection.

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show the “alternating means connect the inlet alternately to the second connection” (claim 2); “four way valve” and “connections ... connected two by two” (claim 4); “alternating the flow through the choke” (claim 6); flow path with two “unidirectional chokes” (claim 7); and “flow direction alternated” (claim 9) as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either

Art Unit: 3637

"Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2-7 and 9-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The objections to the drawings, as set forth above, are considered pertinent since the specification and drawings do not clearly illustrate the fluid flow path in one direction with the valve 20, 31 in a first position, and then flow in the other direction with valve 20, 31 in a second position.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 3, and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2, last two lines, lack clarity-making the claim difficult to understand.

Allowable Subject Matter

Claims 2-7 and 9-12 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. 112, first and second paragraphs, set forth in this Office action.

Response to Arguments

Applicant's arguments, see page 5, filed 29 June 2007, with respect to the rejections of claims 1, 5, and 7 under 35 U.S.C. 102 and 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new rejection is presented. Upon further review, the examiner contends the drawings do not illustrate the alternate flow paths as claimed. The examiner apologizes for addressing this matter at this point in the prosecution.
